Dietary manager

Nutdm.exe (since 1986) nmenur.exe
These programs use what is tried and tested for dietary manager
and a series of additional programs and menus are built up to support the
research in as unobtrusive manner as possible.
The general experience gained is built back into the programs.

I would like to be involved from the beginning
ie from when the data capture documents are drawn up
Its then easier to see that sufficient data and types of data is collected
to investigate the hypotheses

I also prefer to do a trial run

Dietary manager is normally used as the primary data capture software
as it is stable and results may be audited
FEATURES OF DIETARY MANAGER
1. **FOOD SUBSTITUTION LISTS**

3 **DESCENDING LIST OF FOOD NUTRIENT**
A descending order list of all foods for a selected nutrient per portion

4. **FOOD / RECIPE/24 hour / control group COMPARISON PROGRAMS**
